Transition Metal Catalysed / Electrochemical Functionalisation of Organic Molecules: Sustainable Organic Synthesis

Raja Kumar Rit

University of Nottingham, UK

Improvement of synthetic processes are always necessary to meet the huge demand for the world population whilst minimising impacts on health and the environment, therefore demand a greener and sustainable synthesis. Herein a few such methods (for example- catalysis, electrochemical synthesis etc.) are developed to accomplish various organic framework.

Tuesday, Jan 10th 2023

4:00 PM (Tea/Coffee at 3:45 PM)

Auditorium, TIFR-H
