Seminar

**Functional Organics: Materials for OLEDs,
Photovoltaics and Bio-imaging**

Venkatakrishnan Parthasarathy

**National Institute for Nanotechnology, University of
Alberta, Edmonton, Alberta, T6G 2M9 Canada**

Abstract: In recent years, functional organic molecules have captured enormous attention in various fields; for example, organic light emitting diodes (OLEDs) and solar cells are a huge commercial enterprise. This talk will portray engineering efficient organic (photonic, electronic and energy) materials by design and synthesis for fabrication into devices.

Date: Wednesday, April 10th 2013

Time: 11:30AM (Tea/Coffee at 11:15AM)

Venue: Conference Hall, TCIS

All are cordially invited
